PERFORMANCE VIEW FOR EVERY CONDITION

Made by SH+®" is our promise of high quality. For this reason, we set demanding standards for our products and our production facilities and our network of partners. High-level technologies, research and development. Customer-oriented service. These are the reasons everyone who places their trust in us benefits from the best possible protection for sports, leisure and at work.

Made by SH+®" è la nostra promessa di alta qualità. Per questo motivo, abbiamo fissato alti standard per i nostri prodotti e per i nostri impianti di produzione, tecnologie di alto livello, ed un reparto di ricerca e sviluppo. Il nostro servizio è sempre orientato al cliente. Questi sono i motivi per i quali molti clienti pongono la loro fiducia nei nostri prodotti per lo sport, il tempo libero e al lavoro.

«Made by SH+ ®" ist unser hohes Qualitätsversprechen. Aus diesem Grund haben wir hohe Standards für unsere Produkte, unsere Produktionsanlagen, Spitzentechnologien und unsere Forschungs- und Entwicklungsabteilung gesetzt. Unser Service ist immer kundenorientiert. Aus diesem Grund vertrauen viele Kunden unseren Produkten für Sport, Freizeit und Arbeit

GOGGLES TECHNOLOGY

OTG SYSTEM

The ski goggles provided with OTG system have been specifically developed to allow a better comfort for the prescription glasses users.

In the inside goggle frame there is a temple lodgement which doesn't compromise the global goggle comfort.

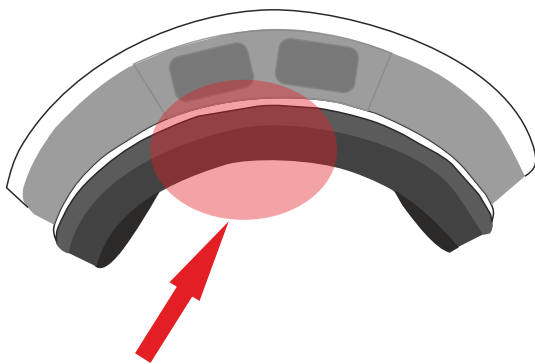

Le maschere con predisposizione OTG sono state sviluppate specificamente per permettere un comfort ottimale per chi utilizza gli occhiali da vista mentre scia. Sul lato interno della maschera è previsto un incavo che prevede l'alloggiamento della stanghetta dell'occhiale da vista, senza compromettere il comfort generale della maschera stessa.

Die mit dem OTG-System ausgestatteten Skibrillen wurden speziell für den optimalen Tragekomfort für Brillenträger beim Skifahren entwickelt.

Im Rahmen der Innenbrille befindet sich eine Aussparung, die den Tragekomfort einer Brille nicht beeinträchtigt.

MULTI LAYER FOAM

Soft, hypoallergenic, multi-layer with micro-pile in contact with the face. Designed to form a complete seal around the face.

Morbido, antiallergico, multistrato con micropile a contatto con il viso. Disegnato per formare un perfetto sigillo intorno al viso.

Weich, antiallergisch, mehrschichtig mit Mikroschaum für den Kontakt mit dem Gesicht. Entworfen, um eine perfekte Abdichtung um das Gesicht zu bilden.

ELASTIC POLYURETHANE FRAME

SH+ uses a unique Polyurethane composite, which allows the outside frame to conform to individual facial features while maintaining its flexibility in extreme cold temperatures.

SH+ utilizza un composto unico di Poliuretano che permette al frame esterno di conformarsi alle caratteristiche del viso mantenendo la propria elasticità in condizioni di temperatura estreme.

SH+ verwendet eine einzigartige Polyurethanverbindung, die es ermöglicht, dass sich der äußere Rahmen an das Gesicht anpasst, während er seine Elastizität unter extremen Temperaturbedingungen beibehält.

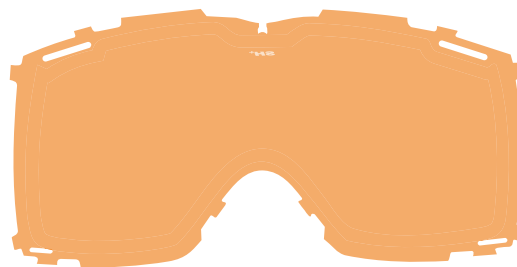

To able to choose the lens you need, it is necessary to become familiar with the technical features of each lens group. Keeping into consideration the weather factors, it is possible to select a specific lens, perfect to enhance its best performance in different conditions.

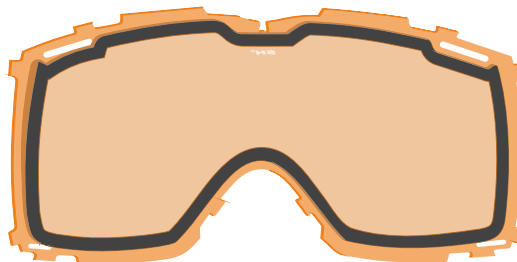

Per poter scegliere la lente più adatta occorre familiarizzare con gli aspetti tecnici di ciascun gruppo di lenti. Tenendo in considerazione una serie di fattori ambientali, è possibile selezionare una lente specifica, adatta a rendere al meglio in diverse condizioni.

Um das richtige Glas zu wählen, müssen Sie sich mit den technischen Eigenschaften vertraut machen. Unter Berücksichtigung der Wetterfaktoren ist es möglich, das perfekte Glas zu wählen, um die beste Leistung unter verschiedenen Bedingungen zu ermöglichen.

SINGLE LENS

DOUBLE LENS

LENS SYSTEM

In a constant technology research, the SH+ lenses grant high visibility and physical eye protection. The optic high quality lenses present several advantages:

- contrast reduction;
- UV rays protection;
- Real view, without colors distortion;
- Different weather conditions adaptability.

Sempre all'avanguardia della tecnologia, le nostre lenti garantiscono acutezza visiva e protezione fisica dell'occhio.

Le lenti ad alta qualità ottica presentano una serie di vantaggi:

- riducono il riverbero;
- favoriscono il contrasto;
- proteggono dai raggi UV;
- garantiscono una vista reale, senza distorsione dei colori;
- proteggono dagli agenti esterni.

Dank ständiger Forschung bieten die SH+ Gläser beste Sicht und besten Augenschutz. Die Qualitätsgläser haben zahlreiche Vorteile:

- Reduzierung von Blendung;
- Kontrastverstärkung;
- Schutz vor UV-Strahlung;
- Echte Sicht ohne Farbverzerrung;

LENSES FEATURES

ACTION LENSES FEATURES

Studied for sunny days and bright light conditions, the "Revo Laser" coating is a specific mirror finish offering higher sunshine protection while boasting superb cosmetic appearance.

Studiato per i giorni molto soleggiati e per condizioni di luce forti, la specchiatura "Revo Laser" è una finitura specchiata che offre una maggiore protezione dai raggi solari mentre dona un effetto estetico molto aggressivo.

Die "Revo Laser" Beschichtung ist eine spezielle spiegelnde Beschichtung, die einen höheren Sonnenschutz bietet und dabei ein hervorragendes Aussehen bietet. Sie wurde besonders für sonnige Tage und helle Lichtverhältnisse entwickelt.

REACTIVE (photocromic) LENSES FEATURES

SH+ photocromic lenses offer an exceptional clear view allowing a visibility without distortion. Thanks to the co-operation with our athletes and promoters we succeeded in offering high quality lenses range and dotated of very quick reaction timing. In this way they had no other chance than to improve their performances!

Le lenti fotocromatiche SH+ offrono una nitidezza eccezionale permettendo una visibilità senza distorsioni. Grazie alla collaborazione con i nostri atleti e promoter siamo riusciti ad offrire una gamma di lenti altamente qualitativa e con tempi di reazione molto rapidi. In questo modo le performance non hanno potuto che migliorare!

Die selbsttönenden Gläser von SH+ bieten eine außergewöhnlich klare und verzerrungsfreie Sicht. Dank der Zusammenarbeit mit unseren Athleten und Markenbotschaftern ist es uns gelungen, qualitativ hochwertige Gläser mit sehr schneller Reaktionszeit anzubieten. Daher hatten sie keine andere Chance, als ihre Leistungen zu verbessern!
