HELMET TECHNO LOGY

Since more than 30 years SH+ manufactures helmets with the purpose of offering the top features in terms of technology, aerodynamic, comfort and, not least, protection. All our experts, with the support of our athletes have the primary aim to succeed in offering between the best products to our consumers.

Da oltre 30 anni SH+ produce caschi con lo scopo di offrire le massime caratteristiche in termini di tecnologia, aerodinamica, comfort e, non per ultimo, protezione. Tutti i nostri esperti, con il supporto dei nostri atleti, hanno come obiettivo principale la capacità di offrire i migliori prodotti ai nostri consumatori.

Seit über 30 Jahren produziert SH+ Helme mit der Absicht, beste Eigenschaften im Bereich Technik, Aerodynamik, Komfort und optimalen Schutz zu bieten. Alle unsere Experten haben das Ziel, mit Hilfe unserer Athleten, die besten Produkte anzubieten.

HELMET FEATURES

The SH+ helmets are engineered and manufactured with different specifications according to the markets of destination.

If your helmet bears a CE designation, it meets the requirements of the Council Directive 89/686/ECC and the European technical Standard EN 1078.

If your helmet bears a CPSC designation, it meets the standard safety requirements of the U.S. Consumer Product Safety Commission.

I caschi SH+ sono progettati e prodotti con specifiche differenti a seconda dei mercati di destinazione. Se il vostro casco è marcato CE, esso è omologato secondo le direttive del C.D. 89/686/ECC e dello standard europeo EN 1078. Se il vostro casco è marcato CPSC, esso è omologato secondo le direttive della US Consumer Product Safety Commission.

Die SH+ Helme sind nach den jeweiligen Spezifikationen der Bestimmungsländer konstruiert und hergestellt.

Wenn Ihr Helm eine CE-Kennzeichnung hat, entspricht er den Anforderungen der Richtlinie 89/686/ECC und der europäischen technischen Norm EN 1078.

Wenn Ihr Helm eine CPSC Bezeichnung hat, entspricht er den Standard-Sicherheitsanforderungen der U.S. Consumer Product Safety Commission.

PROTECTION

The main objective of SH+ is to reduce the consequences of accidents to a minimum.

The combined action of the EPS structure and the polycarbonate cap, thanks to the in-mold technology, creates resistance to the mechanical action exercised by an impact and dissipates the energy in order to prevent it from being transferred to the head of the person wearing the helmet.

L'obiettivo principale di SH+ è di ridurre al minimo le conseguenze degli incidenti. L'azione combinata della struttura in EPS e della calotta in Policarbonato, grazie alla tecnologia IN-MOLD, crea resistenza all'azione meccanica esercitata da un impatto e dissipa l'energia per evitare che venga trasferita alla testa della persona che indossa il casco.

Das Ziel von SH + ist es, die Folgen eines Unfalls auf ein Minimum zu reduzieren. Die kombinierte Wirkung der EPS-Struktur und der äußerern Schale aus Polycarbonat schafft dank der In-Mold-Technologie einen Widerstand gegen die mechanische Einwirkung durch einen Aufprall. Die Energie wird verteilt und vermindert eine Einwirkung auf den Kopf der Person, die den Helm trägt.

LASER CUT TECHNOLOGY

One of the key elements of a SH+ helmet is the extraordinary fit and wearability . Most of our helmets is provided with internal padding made of the exclusive " laser technology cut" . Thanks to laser cutting, we are able to customize the padding with a surgical precision and a design dedicated to the shape and position of the vents in the helmet.

Uno degli elementi chiave di un casco SH+ è la straordinaria calzata e vestibilità. La maggior parte dei nostri caschi è dotata di imbottiture interne realizzate con l'esclusiva tecnologia "laser cut". Grazie al taglio laser siamo in grado di personalizzare l'imbottitura con una precisione chirurgica ed un disegno dedicato alla forma e posizione delle ventilazioni presenti nel casco.

Eine der herausragenden Eigenschaften der SH + Helme ist die außergewöhnliche Passform und der Komfort. Die meisten unserer Helme sind mit einer Innenpolsterung ausgestattet, die durch die exklusive "Laser Cut Technology" ermöglicht wird. Durch die Verwendung von Lasertechnologie sind wir in der Lage, die Polsterung mit chirurgischer Präzision in einem Design anzufertigen, die der Form und Position der Lüftungsschlitze im Helm angepasst ist.

PERFORMING STRAP

Perfect fit : designed by our staff of product, tested by professional athletes , most of our products incorporates extensive conference facilities solutions.

Perfetta vestibilità: progettata dai nostri responsabili del prodotto, testata da atleti professionisti, la maggior parte dei nostri prodotti incorpora soluzioni di comfort eccellenti.

Perfekte Passform: von unseren Mitarbeitern entworfen, von professionellen Athleten getestet; unsere Produkte bieten Lösungen für besten Komfort.

FITTING

One of the key quality element of a SH+ helmet is its maximum comfort. Perfect shaping of the caps, highly-advanced retention systems and internal padding are essential.

Una delle qualità principali di un casco SH+ è il suo massimo comfort. La calzata molto comoda, il regolatore di taglia avvolgente e modulabile e le imbottiture interne sono essenziali per offrire un comfort eccellente.

Eine der herausragenden Eigenschaften der SH + Helme ist das Optimum an Komfort. Die perfekte Form, hochentwickelte Drehsysteme und Innenpolsterung sind entscheidend.

HIGHT VISIBILITY COLORS

Cyclists safety is one of the main goal of SH+. Our helmets are designed to provide the highest standard of performance and safety.

All our lines are manufactured with finest materials while bright and fluorescent colors ensure perfect visibility on the road enhancing riders security and drawing drivers' attention.

La sicurezza dei ciclisti è uno degli obiettivi principali di SH+. I nostri caschi sono progettati per offrire i più alti standard di prestazioni e sicurezza. Tutte le nostre linee sono realizzate con materiali pregiati, mentre i colori brillanti e fluorescenti assicurano una perfetta visibilità sulla strada migliorando la sicurezza dei ciclisti e attirando l'attenzione di chi è alla guida di automezzi.

Die Sicherheit der Radfahrer ist eines der Hauptziele von SH+. Unsere Helme bieten ein Höchstmaß an Leistung und Sicherheit.

Alle unsere Linien sind aus feinsten Materialien gefertigt. Helle und fluoreszierende Farben sorgen für perfekte Sichtbarkeit auf der Straße und erhöhen die Sicherheit der Fahrer und ziehen die Aufmerksamkeit der Fahrer auf sich.

VENTING SYSTEM

Keep your head cool and dry is critical to maintain the performance at the highest level . Thanks to the shape and positioning of external ventilation openings and special inner channels to the outer shell, our helmets are perfectly ventilated and comfortable . The ventilation holes have been designed to allow maximum heat dispersion , thereby avoiding performance degradation due to high temperature and the effective evaporation of perspiration.

Tenere la testa fresca e asciutta è fondamentale per mantenere le prestazioni al massimo livello. Grazie alla forma e al posizionamento delle aperture di aerazione esterne e delle particolari canalizzazioni interne alla calotta, i nostri caschi risultano perfettamente aerati e confortevoli. I fori di aerazione sono stati studiati per consentire la massima dispersione del calore, evitando così cali di prestazione dovuti all'accaldamento e l'evaporazione efficace del sudore.

Es ist entscheidend, den Kopf kühl und trocken zu halten, um Leistung auf höchstem Niveau zu halten.

Dank der Form und Positionierung der externen Belüftungsöffnungen und den speziellen inneren Kanälen zur Außenhülle sind unsere Helme perfekt belüftet und komfortabel. Die Belüftungslöcher wurden so konzipiert, dass sie eine maximale Wärmeverteilung ermöglichen.

Dadurch wird eine Leistungsver schlechterung aufgrund hoher Temperatur vermieden und eine effektive Verdampfung des Schweißes ermöglicht.

MAGNETIC VISOR

The new Tri-Aghon helmet is equipped with a visor with magnetic connection : built for speed! The compact, lightweight and super - aero offers a level of performance super - efficient. The magnets make it easy to remove and place on the front of the helmet when not needed.

Il nuovo casco Tri-aghon è dotato di visiera con attacco magnetico: costruito per la velocità!

Il design compatto, leggero e super-aerodinamico offre un livello di prestazione super-efficiente. I magneti rendono la visiera facile da rimuovere e posizionare sul fronte del casco quando non necessaria.

Der neue Tri-Aghon Helm ist mit einem Visier mit magnetischer Halterung ausgestattet: gebaut für Geschwindigkeit! Der kompakte, leichte Helm in aerodynamischem Design bietet höchstes Leistungsniveau. Durch die Magnete ist das Visier leicht zu entfernen und problemlos auf der Vorderseite des Helms anzubringen, wenn es nicht benötigt wird

RESEARCH AND DESIGN

In addition to ensuring the safety and speed of our athletes, we are committed to innovation from the point of view both of style and comfort; weight reduction, optimization of ventilation and maximum aerodynamics during sports are our priorities.

Oltre a garantire la sicurezza e la velocità dei nostri atleti, siamo costantemente impegnati nell'innovazione sia dal punto di vista dello stile che del confort: riduzione del peso, ottimizzazione della ventilazione e massima aerodinamicità durante l'attività sportiva sono le nostre priorità.

Neben der Gewährleistung der Sicherheit und Geschwindigkeit unserer Athleten, engagieren wir uns durch Innovation im Bereich Stil und Komfort. Reduzierung des Gewichts, die Optimierung der Belüftung und das Maximum an Aerodynamik sind unsere größten Prioritäten

Manzoni Felice - Helmet Designer

PROUDLY MADE BY US

SH+ has focused squarely on producing top quality products with exceptional flair. The helmet specialists spend a great deal of time and energy developing solutions that make helmets as safe, comfortable and flexible to wear as possible.

SH + ha puntato tutto sulla produzione di prodotti di alta qualità con un tocco eccezionale. Gli specialisti del casco impiegano molto tempo ed energie per sviluppare soluzioni che rendano i caschi più sicuri, comodi e flessibili da indossare il più possibile.

SH + hat sich auf die Herstellung von qualitativ hochwertigen Produkten mit außergewöhnlicher Note spezialisiert. Helmspezialisten verwenden viel Zeit und betreiben großen Aufwand, um Lösungen zu entwickeln, die Helme so sicher, bequem und flexibel wie möglich machen.

Team Mutua Levante - Spain

The SH+ cycling helmets models are designed to offer maximum comfort and maximum fit. In the widerange of models, tested by professional athletes, we offer solutions suitable for all somatic features.

I modelli di caschi da bicicletta SH+ sono studiati per offrire il massimo comfort e la massima vestibilità.

Nell'ampia gamma di modelli testati da atleti professionisti, offriamo soluzioni adatte a tutte le caratteristiche somatiche.

Die fahrrad Helmen von SH+ sind fur maximalen Komfort und Passform ausgelegt.

In einer breiten Palette von Modellen , die von professionellen Athleten getestet wurden, bieten wir Losungen fur alle Kopfsomen.

THE SPEED OF LIQ

QUICK CLEARING

FAST DARKENING

the new Reactive Lens adapts to any condition of light

Technology and advanced production techniques are the starting point in the SH+ eyewear projecting. Our sport glasses use high technical materials, perfect to obtain lightweight, functional and extremely comfortable eyewear.

La tecnologia e i sistemi avanzati di produzione sono il punto di partenza nello studio degli occhiali SH+. I nostri occhiali utilizzano materiale molto tecnici adatti a creare occhiali leggeri, funzionali ed estremamente confortevoli.

Technologie und fortschrittliche Produktionsmethoden sind die Basis der SH+ Brillen. Für unsere Modelle verwenden wir modernste Materialien zur Schaffung leichter, funktioneller und extrem komfortabler Sportbrillen.

ADJUSTABLE NOSE PADS AND TIPS

The final part of the temples made of a soft polymer fits perfectly to the curvature of the head, avoiding any form of pressure in the temporal area. The same applies to the nose pads made of soft polymer having a core folding ensuring the excellence of comfort.

La parte finale dell'asta realizzata in un polimero morbido si adatta perfettamente alle curvature del cranio evitando qualunque forma di pressione nella zona temporale.

Lo stesso dicasi per i naselli realizzati in morbido polimero con un'anima pieghevole garantendo l'eccellenza del comfort.

Die Bügelenden, bestehend aus einem weichen Polymer, passen sich perfekt an die Krümmung des Kopfes an und vermeiden jede Form von Druck in diesem Bereich.

EASY CHANGE INTERCHANGEABLE LENSES

The system of interchangeable lenses called Easy-Change is one of the basic technologies of our sport glasses. Every sport glasses model has different way of fitting and removing the lenses. The shape of the lenses and the frame interact differently. Easy-Change technology enables you to easily change out lenses to manage any light condition.

Il sistema di sostituzione delle lenti chiamato Easy-Change è una delle tecnologie di base dei nostri occhiali sportivi. Ogni modello ha un sistema differente di sostituzione delle lenti. La forma delle lenti e della montatura interagiscono differentemente. La tecnologia Easy-Change vi permette di cambiare facilmente le lenti per adattare i vostri occhiali ad ogni condizione di luce.

Das Glaswechsel-System Easy-Change ist eine der Grundtechnologien unserer Sportbrillen. Jedes Sportbrillenmodell verfügt über eine andere Art des Glaswechsels. Die Form der Gläser und der Rahmen sind unterschiedlich. Easy-Change ermöglicht das einfache Wechseln und Anpassen an jede Bedingung.

VENTING SYSTEM

Fogging reduction for a vision of absolute transparency : ventilations from the lenses of our glasses are used to control the air flow to reduce thermal shock and prevent fogging . Thus ensuring perfect vision and optimum ventilation .

Riduzione dell'appannamento per una visione della trasparenza assoluta: le ventilazioni presenti sulle lenti dei nostri occhiali permettono di controllare il flusso d'aria per ridurre lo shock termico e impedire l'appannamento. Si assicurano così una visione perfetta e una ventilazione ottimale

Die Reduzierung des Beschlagens für beste Sicht: Die Belüftung durch die Gläser unserer Brillen dient zur Regelung des Luftstromes, um Überhitzung und Beschlagen zu vermeiden. So ist für bestes Sehen und optimale Belüftung gesorgt.

PERFECT FIT

All our sport glasses have been completely studied to offer the maximum comfort and a perfect fit. Studied by highly specialized designers, the main part of our products have integrated optimal comfort solutions to adjustable temples for an absolute customisation. They adapt to the physical characteristics of each ethnicity.

Tutti i nostri occhiali sono interamente studiati per offrire il massimo comfort e una calzata perfetta. Progettati da designer altamente specializzati, la maggioranza dei nostri prodotti integra soluzioni ottimali per il comfort ad aste regolabili per un'assoluta personalizzazione. Si adattano alle caratteristiche somatiche di ogni etnia.

Unsere Brillen sind für maximalen Komfort und perfekte Passform entworfen. Geschaffen von hochspezialisierten Designern, verfügt die Mehrzahl unserer Produkte über optimale Lösungen für besten Komfort durch verstellbare Bügel für eine optimale Anpassung. Sie passen sich an die physischen Eigenschaften ihrer Träger an.

LENSES TECHNOLOGY

For particular light conditions, SH+ offers technically advanced specialty lenses with high visual quality customized to your needs. The various lenses enable you to perform and excel in any light or atmospheric condition you may encounter.

Our lens program has features common to every type of lens, such as neutralizing ultraviolet radiation completely up to 400 nm (UV 400 protection) and maintains colors integrity even with the dark filters.

In order to meet our athletes needs, we have added to our lenses range some specific treatments including antifog, hydrophobic and photocrochromic technology.

A seconda delle diverse condizioni di luce, SH+ offre lenti altamente specializzate con ottimi livelli di qualità visiva atti a soddisfare le vostre necessità. I diversi tipi di lenti vi permetteranno di ottenere performance ottimali in ogni condizione di luce o atmosferica.

Il nostro programma di lenti ha caratteristiche comuni per ogni tipo di lente, quali la neutralizzazione dei raggi ultravioletti fino a 400 nm (UV 400 protection) e il mantenimento dell'integrità dei colori anche nei filtri più scuri.

Le lenti SH+ non offrono solamente protezione agli occhi contro agenti esterni e raggi ultravioletti, ma amplificano anche la nitidezza della vista e minimizzano la distorsione, offrendo la migliore qualità per la pratica dei diversi sport.

Per venire incontro alle esigenze dei nostri sportivi, abbiamo inserito nella nostra linea di lenti trattamenti specifici, quali l'anti-appannamento, l'idrofobico ed il fotocromatico.

Für alle Lichtverhältnisse bietet SH+ technisch fortschrittliche Spezialgläser mit hoher optischer Qualität für Ihre Bedürfnisse an. Die verschiedenen Gläser ermöglichen optimale Leistung bei jedem Licht und jeder Wetterbedingung.

Unser Programm verfügt über alle Arten von Gläsern, die UV-Strahlung bis zu 400 nm (UV 400 Schutz) neutralisieren und selbst bei dunklen Tönungen die Farbtreue behalten.

Um die Bedürfnisse unserer Athleten optimal zu erfüllen, haben wir unsere Gläser einer Reihe spezifischer Behandlungen unterzogen: Das umfasst Anti-Beschlag, wasserabweisende und selbsttönende Technologie.

LENSES SYSTEM

In a constant technology research, the SH+ lenses grant high visibility and physical eye protection. The optic high quality lenses present several advantages:

- contrast reduction;
- UV rays protection;
- Real view, without colors distortion;
- Different weather conditions adaptability.

Sempre all'avanguardia della tecnologia, le nostre lenti garantiscono acutezza visiva e protezione fisica dell'occhio.

Le lenti ad alta qualità ottica presentano una serie di vantaggi:

- riducono il riverbero;
- favoriscono il contrasto;
- proteggono dai raggi UV;
- garantiscono una vista reale, senza distorsione dei colori;
- proteggono dagli agenti esterni.

Dank ständiger Forschung bieten die SH+ Gläser beste Sicht und besten Augenschutz. Die Qualitätsgläser haben zahlreiche Vorteile:

- Reduzierung von Blendung;
- Kontrastverstärkung;
- Schutz vor UV-Strahlung;
- Echte Sicht ohne Farbverzerrung;
- Anpassung an verschiedene Wetterbedingungen.

NO REFLEX (POLARIZED) FEATURES

SH+ photocromic lenses offer an exceptional clear view allowing a visibility without distortion. Thanks to the co-operation with our athletes and promoters we succeeded in offering high quality lenses range and dotated of very quick reaction timing. In this way they had no other chance than to improve their performances!

Le lenti NO REFLEX SH+ offrono una nitidezza eccezionale permettendo una visibilità senza distorsioni. Grazie alla collaborazione con i nostri atleti e promoter siamo riusciti ad offrire una gamma di lenti altamente qualitativa e con tempi di reazione molto rapidi. In questo modo le performance non hanno potuto che migliorare!

Die selbsttönenden Gläser von SH+ bieten eine außergewöhnlich klare und verzerrungsfreie Sicht. Dank der Zusammenarbeit mit unseren Athleten und Markenbotschaftern ist es uns gelungen, qualitativ hochwertige Gläser mit sehr schneller Reaktionszeit anzubieten. Daher hatten sie keine andere Chance, als ihre Leistungen zu verbessern!

REFLEX BROWN (POLARIZED)

Trasmittance: 25%

Category: 3

Reactive Flash Color lenses are guaranteed unbreakable for life. Their molecular semi-rigid properties ensure unique light management and unparalleled eye protection from sun rays and atmospheric elements.

Reactive Flash Color lenses are made by photochromic particles which provide unique climatic management technology. Getting dark from low to high light transmission within few seconds and tailored to reach a custom color from an initial clear state, Reactive Flash Color lenses are available in 3 different colors and with the Laser mirrored coating (Flash Silver, Flash Red, Flash Blue). Reactive Flash Color lenses enhance contrast, even in darker conditions, they will improve visual acuity and depth perception while providing unparalleled eye protection. Unlike most photochromic standard lenses, Reactive Flash Color lenses are fused in the mass of the polymer itself with a complex manufacturing process, making it more resistant and clearly optically superior to most competitors.

Reactive Flash Color are made with NXT™ technology which ensures:

- Light weight;
- Optically superior quality;
- Stability over time;
- Resistance to solvents.

NXT™ is far more resistant than Glass and weights less than half of it, furthermore, differently from other high impact polymers, NXT™ has a Refractive Index very similar to Glass.

The performance of a sun filter does not only depend from the material with which the lens is manufactured. It does not depend either from the colour of lenses, but from the type of filtration. Visual performances of a lens depends from light absorbance grade chosen for each radiation length.

Le lenti Reactive Flash Color sono garantite infrangibili a vita. Le loro proprietà molecolari assicurano una gestione della luce unica ed una protezione degli occhi senza pari dai raggi solari e dagli elementi atmosferici.

Le lenti Reactive Flash Color sono realizzate con particelle fotocromatiche che offrono una tecnologia di gestione climatica unica.

Scurendosi da una trasmissione di luce scarsa a elevata in pochi secondi e su misura per raggiungere un colore personalizzato da uno stato iniziale chiaro, le lenti Reactive Flash Color sono disponibili in 3 diversi colori e con il rivestimento a specchio Laser (Flash Silver, Flash Red, Flash Blue). Le lenti Reactive Flash Color migliorano il contrasto, anche in condizioni di oscurità, migliorano l'acuità visiva e la percezione della profondità fornendo una protezione degli occhi senza pari.

A differenza della maggior parte delle lenti standard fotocromatiche, le lenti Reactive Flash Color sono fuse nella massa del polimero stesso con un processo di fabbricazione complesso, rendendolo più resistente e chiaramente otticamente superiore alla maggior parte dei concorrenti.

Le lenti Reactive Flash Color sono realizzate con la tecnologia NXT™ che garantisce:

- Peso leggero;
- Qualità ottica superiore;
- Stabilità nel tempo;
- Resistenza ai solventi.

NXT™ è molto più resistente del vetro e pesa meno della metà di esso; inoltre, diversamente dagli altri polimeri ad alto impatto, NXT™ ha un indice di rifrazione molto simile al vetro.

Le prestazioni di un filtro solare non dipendono solo dal materiale con cui viene fabbricata la lente. Non dipende nemmeno dal colore delle lenti, ma dal tipo di filtrazione. Le prestazioni visive di una lente dipendono dal grado di assorbanza della luce scelto per ciascuna lunghezza di radiazione.

Reactive Flash Color Gläser sind garantiert lebenslang unzerbrechlich. Ihre molekularen halbstarren Eigenschaften gewährleisten ein einzigartiges Lichtmanagement und einen unvergleichlichen Augenschutz vor Sonnenstrahlen und atmosphärischen Einflüssen.

Reactive Flash Color Gläser werden aus selbsttönenden Partikeln hergestellt, die einzigartiges Licht- und Wettermanagement bieten. Die Reactive Flash Color Gläser tönen innerhalb weniger Sekunden von schwacher zu hoher Tönung und erreichen vom anfänglichen klaren Zustand ihre benutzerdefinierte Farbe. Sie sind in drei verschiedenen Farben und mit lasergespigelter Beschichtung (Flash Silver, Flash Red, Flash Blue) erhältlich. Reactive Flash Color Gläser verbessern den Kontrast, auch unter dunkleren

Bedingungen. Sie verbessern die Sehschärfe und Tiefenwahrnehmung und bieten einen unvergleichlichen Augenschutz. Im Gegensatz zu den meisten selbst Standardgläsern werden Reactive Flash Color Gläser mit einem komplexen Herstellungsverfahren in der Masse des Polymers selbst verschmolzen, wodurch es widerstandsfähiger und den meisten Mitbewerbern optisch deutlich überlegen ist.

Reactive Flash Color Gläser werden mit der NXT™ -Technologie hergestellt, die Folgendes gewährleistet:

- geringes Gewicht
- Optisch überlegene Qualität
- hohe Lebensdauer
- Widerstandsfähigkeit gegen Lösungsmittel

NXT™ ist weitaus widerstandsfähiger als Glas und wiegt weniger als die Hälfte. Anders als andere widerstandsfähige Polymere hat NXT™ einen Brechungsindex, der dem von Glas sehr ähnlich ist.

Die Leistung eines Filters hängt nicht nur von dem Material ab, aus dem das Glas hergestellt ist. Es kommt nicht einmal auf die Farbe der Gläser an, sondern auf die Art der Filtration. Die visuelle Leistung eines Glases hängt vom Absorptionsgrad des für jede Wellenlänge gewählten Lichts ab.

RESEARCH AND DESIGN

SH+ is always looking for state-of-the-art technology to offer the consumer a better product every day. Our artisans thanks to technological materials create a comfortable, lightweight product suitable for every sport.

SH+ è sempre alla ricerca di una nuova tecnologia all'avanguardia per offrire al consumatore un prodotto ogni giorno migliore.

Grazie a materiali tecnologici, i nostri artigiani creano un prodotto confortevole, leggero, adatto ad ogni sport.

SH+ ist immer auf der Suche nach den modernsten Technologien, um dem Verbraucher stets ein besseres Produkt zu bieten.

Unsere Handwerker schaffen dank technologischer Materialien komfortable, leichte Produkte für alle Sportarten.

The SH+ sport glasses models are designed to offer maximum comfort and maximum fit. In the wide range of models, tested by professional athletes, we offer solutions suitable for all somatic features of every type of face.

I modelli di occhiale sportivi SH+ sono studiati per offrire il massimo comfort e la massima vestibilità.

Nell'ampia gamma di modelli, testati da atleti professionisti, offriamo soluzioni adatte a tutte le caratteristiche somatiche di ogni tipologia di viso.

Die Sportbrillen von SH+ sind für maximalen Komfort und Passform ausgelegt.

In einer breiten Palette von Modellen, die von professionellen Athleten getestet wurden, bieten wir Lösungen für alle Gesichtsformen.
